POPCORN TO ROCK 'n' ROLL - Book One of trilogy, 2nd edition

Paperback. 222 pages with 50 period photographs

**It is an extraordinary 'history' written as a novel.
A story of young love, hardship, determination and music.
Often funny, sometimes poignant, occasionally 'shocking'.**

Reg and Dorothy Calvert fall madly in love and marry, too soon. Life is hard in postwar England and with little money, Reg converts an old bus into a caravan and they travel from Huddersfield to Southampton. He tries many ways to earn a living, including making popcorn. Dorothy yearns for a nice home and quiet life, but cannot persuade Reg to settle down.

After hearing Bill Haley's 'Rock Around the Clock', Reg gave up his steady job as a radio and television engineer, and single-mindedly set out on a quest to bring Rock 'n' Roll to England.

What happens next is amazing

Most musicians played big-band music or skiffle and hadn't even heard of 'rock'.

Reg became like the Pied Piper as young musicians, singers and guitarists, followed

him to create a new kind of music. He mentored and helped new groups, and employed

probably more early 'rock' stars than anyone else. They put on the first fantastic

BIG BEAT shows and toured the country's dancehalls.

These are exciting times and there had never been anything like it.

There are mad antics, crazy days, sex and drugs, but not in the way you would imagine.

Soon, others were copying Reg and the press were writing about his 'School of Rock',

You can see how I have been occupying my lock-down year. Next year, I hope to be able to exhibit my

Art again, and have more holidays. I'm also thinking of rewriting/illustrating my children's

book, the Enchanted Castle, and renaming it '1266 Lost in Time'. I'll let you know how I get on.

I hope you have a safe and happy Christmas and a wonderful New Year.

Kind Regards,

Susan
